

## Sloe Gin

### Equipment

- 1 Demijon or Kilner Jar
- 1 Lb or 454 gram Sloes
- 1 Pint of Gin
- 1 lb or 454 of Brown Sugar
- 1 clove

Wash and prick Sloe's mix with gin and sugar add 1 clove, cork, leave, in a dark place, aids retention of colour, for as long as you can, shaking weekly, decant into bottles filtering as you go, a coffee filter is great, it has been suggested that after the sloes have been removed from the Sloe Gin adding them, for some time, to port – Can someone please report back on this and tell us if the Port improves
